

## Corporate Profile

Founded	December 15, 2006
Employees	~65 worldwide
Funding Profile	Privately held and entirely venture capital funded by Oak Investment Partners, Gabriel Venture Partners, Noventi Ventures, and others.
Management Team	Brian Hinman, Executive Chairman Greg Bafalis, Chief Executive Officer Tom Willardson, Chief Financial Officer Matt Caspari, Managing Director, Australia Guido Radaelli, VP, Engineering Dr. Bertrand Vick, Ph.D., Chief Scientific Officer Connie Sandusky, Senior VP, Sales
Mission	Aurora Algae leads the world in the development of high performance, sustainable algae-based alternatives that improve the way we live and grow. Our unique algae platform and optimized production and processing methods yield a plethora of cost-effective, high-value products addressing a number of growing markets.
Product Portfolio	Consider the variety of products that are derived from our sustainably farmed algae crops.  <i>Nutrition, Pharmaceuticals:</i> Our Omega-3 products deliver the highest natural potency EPA, providing the purest, high quality basis for supplements and pharmaceuticals. And because our EPA comes straight from the source (algae), it is 100% vegetarian, truly sustainable, and an ideal alternative to those avoiding fish or soy products.  <i>Feed, Food:</i> Algae provide a more complete source of allergy free protein, grown more efficiently than any other source. Protein derived from Aurora Algae serve the explosive health, weight management, and sports markets demanding natural, sustainable alternatives to supplement the needs of a protein rich diet. Remaining algae mass creates a nutritional, protein rich feed for fish and animals.  <i>Fuel:</i> Combining scientific innovation and engineering efficiencies, Aurora has created a pathway for the cost-effective mass production of algae-based biofuel. Our process is carbon-mitigating and non-competitive with agricultural resources, and capable of industrial yields with a minimal land requirement.

**Customer Philosophy** Our product portfolio is diverse, but our customer philosophy is simple. Collaborate with thought leaders dedicated to delivering high quality, cost competitive solutions to their customers. We recognize that one size does not fit all when it comes to the products that can be made from our algal biomass. So we work side by side with our customers to design solutions that fit their specific applications.

<b>Offices</b>	<u><b>Aurora Algae, Inc.</b></u>	<u><b>Aurora Algae Pty Ltd.</b></u>	
	Corporate Headquarters 3325 Investment Blvd. Hayward, CA 94545 USA	Australia Headquarters Level 3, 679 Murray Street West Perth, WA 6005 AUSTRALIA	<i>Postal Address</i> PO Box 1644 West Perth, WA 6872 AUSTRALIA
		Australia Production Facility One Millars Road Karratha, WA 6714 AUSTRALIA	<i>Postal Address</i> PO Box 862 Karratha, WA 6714 AUSTRALIA

**Scientific Advisors**

Dr. Christoph Benning is a Professor of Biochemistry at Michigan State University studying biochemistry and metabolism of plants and algae.

Dr. William Freytag is the Chairman and Chief Executive Officer of BaroFold, Inc and former CEO of Aspreva Pharmaceuticals (acquired by Galencia Group) and former CEO of Myogen, Inc. (acquired by Gilead Sciences).

Dr. Krishna Niyogi is a professor of Plant and Microbial Biology at UC Berkeley focused on the molecular genetics and ecophysiology of algae and plants.

Dr. Mario Tredici is a professor of microbiology at the University of Florence and a leader in the mass cultivation of microalgae as feed, chemical and renewable fuels.
